EDITORIAL REVIEW

Renal antioxidant enzymes: Their regulation and function. *Iekuni Ichikawa, Shigeru Kiyama, and Toshimasa Yoshioka* 1

LABORATORY INVESTIGATION

Light- and electronmicroscope distribution of taurine, an organic osmolyte, in rat renal tubule cells. *Mahmood Amiry-Moghaddam, Erlend Nagelhus, and Ole Petter Ottersen* 10

Regulation of human renal adenocarcinoma cell growth by retinoic acid and its interactions with epidermal growth factor. *Àngel Argilés, Tetsuya Ootaka, Prudence A. Hill, David J. Nikolic-Paterson, Paul Hutchinson, Norbert E. Kraft, and Robert C. Atkins* 23

ICAM-1 directs migration and localization of interstitial leukocytes in experimental glomerulonephritis. *Prudence A. Hill, Hui Y. Lan, David J. Nikolic-Paterson, and Robert C. Atkins* 32

Urokinase-plasminogen activator is synthesized *in vitro* by human glomerular epithelial cells but not by mesangial cells. *Paul A.J. Brown, Heather M. Wilson, Fiona J. Reid, Nuala A. Booth, John G. Simpson, Lynne Morrison, David A. Power, and Neva E. Haites* 43

HK-2: An immortalized proximal tubule epithelial cell line from normal adult human kidney. *Michael J. Ryan, Gretchen Johnson, Judy Kirk, Sally M. Fuerstenberg, Richard A. Zager, and Beverly Torok-Storb* 48

Increased urinary saturation and kidney calcium content in genetic hypercalciuric rats. *David A. Bushinsky, Mark Kim, Nelson Sessler, Yasushi Nakagawa, and Fredric L. Coe* 58

Atrial natriuretic peptide and cGMP inhibit Na^+/H^+ antiporter in vascular smooth muscle cells in culture. *Carlos Caramelo, Antonio López-Farré, Amparo Riesco, Ana Olivera, Koji Okada, Edward J. Cragoe, Jr., Phoebe Tsai, Verena A. Briner, and Robert W. Schrier* 66

Urinary and biliary excretion of aluminoxamine and ferrioxamine in dogs with various renal function. *Patrick C. D'Haese, Ludwig V. Lamberts, Gert A. Verpooten, Wouter Vaneerdeweg, Angelika Jurgens, Sahak Arakelian, Ara Babloyan, Panagiotis Digenis, Wiebren Tjalma, and Marc E. De Broe* 76

Characterization of pure proximal and heterogeneous distal human tubular cells in culture. *Inge Van Der Biest, Etienne J. Nouwen, Sibille A. Van Dromme, and Marc E. De Broe* 85

Induction of calbindin D-28K in Madin-Darby bovine kidney cells by $1,25(OH)_2D_3$. *AnneMarie Gagnon, Maura Simboli-Campbell, and JoEllen Welsh* 95

The normalized protein catabolic rate is a flawed marker of nutrition in CAPD patients. *John C. Harty, Helen Boulton, Janet Curwell, Nita Heelis, Linda Uttley, Michael C. Venning, and Ram Gokal* ... 103

Complex subcellular distribution of sodium-dependent amino acid transport systems in kidney cortex and LLC-PK_1/Cl_4 cells. *Charles B. Hensley and Austin K. Mircheff* 110

Nephron segment and cell-type specific expression of gangliosides in the developing and adult kidney. *Harry Holthöfer, Jukka Reivinen, and Aaro Miettinen* 123

Effects of BQ-123 on renal function and acute cyclosporine-induced renal dysfunction. *Salah D. Kivlighn, Robert A. Gabel, and Peter K.S. Siegl* 131

Heparin inhibits endothelin-1 production in cultured rat mesangial cells. *Masakazu Kohno, Koji Yokokawa, Takeshi Horio, Miwako Ikeda, Naotsugu Kurihara, Anil K. Mandal, and Tadanao Takeda* 137

Contents continued on next page

A new single nephron model of focal and segmental glomerulosclerosis in the Munich-Wistar rat. *Wim E.A.A. Laurens, Yves F. Ch. Vanrenterghem, Paul S.J. Steels, and Boudewijn J.C. Van Damme* . 143

Interleukin-1-induced cyclooxygenase 2 expression is suppressed by cyclosporin A in rat mesangial cells. *Michael Martin, Detlef Neumann, Torsten Hoff, Klaus Resch, David L. DeWitt, and Margarete Goppelt-Struebe* 150

Cytokine stimulation of prostaglandin production inhibits the proliferation of serum-stimulated mesangial cells. *Douglas G. Matsell, Lillian W. Gaber, and Kafait U. Malik* 159

Effect of pyruvate on oxidant injury to isolated and cellular DNA. *Karl A. Nath, Helen Enright, Louise Nutter, Michael Fischereder, Jing-Nan Zou, and Robert P. Hebbel* 166

Angiotensin II stimulates human fetal mesangial cell proliferation and fibronectin biosynthesis by binding to AT_1 receptors. *Patricio E. Ray, Leslie A. Bruggeman, Satoshi Horikoshi, Greti Aguilera, and Paul E. Klotman* 177

Thromboxane A_2 receptor blockade improves renal function and histopathology in the post-obstructive kidney. *Craig A. Rinder, Perry V. Halushka, Mary Ann Sens, and David W. Ploth* . 185

Prevention of brain demyelination in rats after excessive corection of chronic hyponatremia by serum sodium lowering. *Alain Soupart, Raymond Penninckx, Laurent Crenier, Alain Stenuit, Olivier Perier, and Guy Decaux* 193

Tenascin is an important component of the glomerular extracellular matrix in normal and pathologic conditions. *Luan D. Truong, Jana Pindur, Roberto Barrios, Vivette D'Agati, Juan Lechago, Wadi Suki, and Mark Majesky* 201

Induction of manganese superoxide dismutase by glucocorticoids in glomerular cells. *Tohimasa Yoshioka, Tetsuya Kawamura, Barbara O. Meyrick, Jeffrey K. Beckman, Richard L. Hoover, Hiroaki Yoshida, and Iekuni Ichikawa* 211

CLINICAL INVESTIGATION

Heme biosynthesis in uremic patients on CAPD or hemodialysis. *Antonio Fontanellas, Francisco Coronel, Jose L. Santos, Jose A. Herrero, Maria J. Moran, Pedro Guerra, Fernando Tornero, and Rafael Enriquez de Salamanca* 220

Anemia of uremia is associated with reduced *in vitro* cytokine secretion: Immunopotentiating activity of red blood cells. *Uzi Gafter, Yona Kalechman, Jerome B. Orlin, Joseph Levi, and Benjamin Sredni* 224

Vancomycin redistribution: Dosing recommendations following high-flux hemodialysis. *Theresa A. Pollard, Victor Lampasona, Shawn Akkerman, Karen Tom, Michael A. Hooks, Richard E. Mullins, and Bradley J. Maroni* 232

The impact of hepatitis C virus infection on renal allograft recipients. *David Roth, Keith Zucker, Robert Cirocco, Angelo DeMattos, George W. Burke, Jose Nery, Violet Esquenazi, Sharon Babishckin, and Joshua Miller* 238

Effects of oral calcitriol on bone mineral density in patients with end-stage renal failure. *Patrick Ruedin, René Rizzoli, Daniel Slosman, Michel Leski, and Jean-Phillipe Bonjour* 245

Biochemical markers of renal osteodystrophy in pediatric patients undergoing CAPD/CCPD. *Isidro B. Salusky, Jorge A. Ramirez, William Oppenheim, Barbara Gales, Gino V. Segre, and William G. Goodman* 253

Risk of radiocontrast nephropathy in patients with and without diabetes mellitus. *Lawrence S. Weisberg, Peter B. Kurnik, and Brenda R.C. Kurnik* 259

NEPHROLOGY FORUM

Mechanisms and management of nephrotic edema. *Michael H. Humphreys* 266

Volume 45, Supplement 44

Highlights of the XIIth ISN Congress

Jerusalem, Israel, June 13–18, 1993

Table of Contents

Introduction. *Joseph B. Rosenfeld* S-1

Editorial. *Jacques Bernheim, Geoffrey Boner, and Mordecai M. Popovtzer* S-3

I. STATE OF THE ART ADDRESSES

Proinflammatory mediators of glomerular injury and mechanisms of activation of autoreactive T cells. *Giuseppe Remuzzi, Carla Zoja, and Norberto Perico* S-8

Integrins. *Erkki Ruoslahti, Nancy A. Noble, Shoji Kagami, and Wayne A. Border* S-17

Regulation of renal proximal tubular Na/H exchange: A tissue culture approach. *Heini Murer, Reto Krapft, and Corinna Helmle-Kolb* S-23

Structure-function studies of the Na,K-ATPase. *Jerry B. Lingrel, James Van Huysse, William O'Brien, Elizabeth Jewell-Motz, Roger Askew, and Patrick Schultheis* S-32

In pursuit of the "Holy Grail": Allograft tolerance. *Peter W. Nickerson, Wolfgang Steurer, Jurg Steiger, and Terry B. Strom* S-40

T cells in autoimmunity and allograft rejection. *Alan M. Krensky* S-50

Tabulations and expectations regarding the genetics of human hypertension. *Roger R. Williams, Steven C. Hunt, Paul N. Hopkins, Sandra J. Hasstedt, Lily L. Wu, and Jean Marc Lalouel* . S-57

New approaches to renal biopsy assessment in acute renal failure: Extrapolation from renal transplantation. *Kim Solez, Lorraine C. Racusen, and Steen Olsen* S-65

Erythropoietin: The promise and the facts. *Joseph W. Eschbach* S-70

Bioincompatibility—Perspectives in 1993. *Reinhold Deppisch, Eberhard Ritz, Gertrud Maria Hänsch, Margarita Schöls, and Ernst-Wilhard Rauterberg* S-77

Adequacy of hemodialysis and nutrition—Important determinants of morbidity and mortality. *Robert M. Lindsay, A. Paul Heidenheim, Evelyn Spanner, Claude Kortas, and Peter G. Blake* S-85

Immunological considerations of the uremic and dialyzed patient. *Lucienne Chatenoud, Paul Jungers, and Béatrice Descamps-Latscha* S-92

The kidney and calcium homeostasis. *Kiyoshi Kurokawa* S-97

II. INTERNATIONAL SOCIETY OF NEPHROLOGY AWARDS

Presentation of the 1993 A.N. Richards Award to Gerhard Giebisch. *Donald W. Seldin* S-106

Acceptance of the 1993 A.N. Richards Award. *Gerhard Giebisch* S-110

Presentation of the 1993 Jean Hamburger Award to Gabriel Richet. *Eberhard Ritz* S-112

Contents continued on next page

Acceptance of the 1993 Jean Hamburger Award. *Gabriel Richet* S-113
Presentation of the 1993 Jean Hamburger Award to Hugh E. de Wardener. *Eberhard Ritz* S-114
Acceptance of the 1993 Jean Hamburger Award. *Hugh E. de Wardener* S-115

III. REPORTS OF THE ISN EXECUTIVE COMMITTEE

Report of the President to the ISN General Assembly. *Roscoe R. Robinson* S-116
Report of the incoming ISN President. *J. Stewart Cameron* S-119
Report of the Secretary General. *Claude Amiel* S-121
Report of the Treasurer, 1990–1993. *C. Craig Tisher* S-123
Report of the Editor. *Thomas E. Andreoli* S-125
Corporate Sponsors of the XIIth International Congress of Nephrology S-128

SYMPOSIUM ON THE GLOMERULUS—FROM TISSUE CULTURE TO MAN

Introduction. *Gerald A. Coles, Malcolm Davies, and John D. Williams* 299

CELL BIOLOGY AND THE GLOMERULUS

Dysfunctions of cell biological mechanisms of visceral epithelial cells (podocytes) in glomerular diseases. *Dontscho Kerjaschki* 300

The biology of the glomerulus: Endothelial cells. *Caroline O.S. Savage* 314

The mesangial cell: A tissue culture view. *Malcolm Davies* 320

Glomerular matrix: Synthesis, turnover and role in mesangial expansion. *John R. Couchman, Lesley A. Beavan, and Kevin J. McCarthy* 328

Renal actions of endothelin: Linking cellular signaling pathways to kidney disease. *Tobias A. Marsen, Herbert Schramek, and Michael J. Dunn* 336

Loss of glomerular function and tubulointerstitial fibrosis: Cause or effect? *Albert C.M. Ong and Leon G. Fine* 345

Role of oxidants and proteases in glomerular injury. *Richard J. Johnson, David Lovett, Robert I. Lehrer, William G. Couser, and Seymour J. Klebanoff* 352

Glomerular cells *in vitro* versus the glomerulus *in vivo*. *Jürgen Floege, Heinfried R. Radeke, and Richard J. Johnson* 360

CLINICAL DISEASE AND THE GLOMERULUS

A role for podocytes to counteract capillary wall distension. *Wilhelm Kriz, Eberhard Hackenthal, Rainer Nobiling, Tatsuo Sakai, and Marlies Elger* 369

The immunogenetics of glomerulonephritis. *Andrew J. Rees* 377

Relevance of single nephron studies to human glomerular function. *Sharon Anderson* 384

The biophysical basis of hypofiltration in nephrotic humans with membranous nephropathy. *Robert H. Ting, Batya Kristal, and Bryan D. Myers* 390

Glomerular perm-selective function. *Andrea Remuzzi and Giuseppe Remuzzi* 398

The paradox of the renin-angiotensin system in chronic renal disease. *Mark E. Rosenberg, Lawrence J. Smith, Ricardo Correa-Rotter, and Thomas H. Hostetter* 403

What does the renal reserve mean? *David M. Thomas, Gerald A. Coles, and John D. Williams* . 411

Pharmacologic manipulation of glomerular function. *Pieter M. ter Wee and Ab J.M. Donker* ... 417

Glomerular distribution of type IV collagen in diabetes by high resolution quantitative immunochemistry. *Dan Zhu, Youngki Kim, Michael W. Steffes, Thomas J. Groppoli, Ralph J. Butkowski, and S. Michael Mauer* 425

Familial, hemodynamic and metabolic factors in the predisposition to diabetic kidney disease. *Kenneth Earle and Gian Carlo Viberti* 434

Contents continued on next page

Systemic hypertension versus intraglomerular hypertension in progression. *Eberhard Ritz, Stephan Orth, Thomas Weinreich, and Jürgen Wagner* 438

Proteinuria—A direct cause of renal morbidity? *John D. Williams and Gerald A. Coles* 443

LABORATORY INVESTIGATION

Alternative pathway activation of complement by cultured human proximal tubular epithelial cells. *Luigi Biancone, Salvatore David, Valentina Della Pietra, Giuseppe Montrucchio, Vincenzo Cambi, and Giovanni Camussi* 451

Two vitamin D_3-dependent calcium binding proteins increase calcium reabsorption by different mechanisms I. Effect of CaBP 28K. *Ihssane Bouhtiauy, Daniel Lajeunesse, Sylvia Christakos, and Michèle G. Brunette* 461

Two vitamin D_3-dependent calcium binding proteins increase calcium reabsorption by different mechanisms II. Effect of CaBP 9K. *Ihssane Bouhtiauy, Daniel Lajeunesse, Sylvia Christakos, and Michèle G. Brunette* 469

Amadori glucose adducts modulate mesangial cell growth and collagen gene expression. *Margo P. Cohen and Fuad N. Ziyadeh* 475

Renin-angiotensin system in neonatal rats: Induction of a renal abnormality in response to ACE inhibition or angiotensin II antagonism. *Peter Friberg, Birgitta Sundelin, Sven-Olof Boman, Alexander Bobik, Holger Nilsson, Anna Wickman, Helena Gustafsson, John Petersen, and Michael A. Adams* 485

Effect of chronically increased erythrocyte complement receptors on immune complex nephritis. *Lee A. Hebert, Daniel J. Birmingham, John D. Mahan, Xiao-Ping Shen, Cynthia McAllister, Fernando G. Cosio, and John J. Dillon* 493

LPS induces major changes in the extracellular proteolytic balance in the murine kidney. *Solange Moll, Jürg Alfred Schifferli, Joaquim Huarte, Robert Lemoine, Jean-Dominique Vassalli, and André-Pascal Sappino* 500

Effect of vitamin D metabolites on calcitriol degradative enzymes in renal failure. *Sanjeevkumar R. Patel, Hui Qiong Ke, and Chen H. Hsu* 509

Osteopontin expression in angiotensin II-induced tubulointerstitial nephritis. *Cecilia M.Giachelli, Raimund Pichler, Donna Lombardi, David T. Denhardt, Charles E. Alpers, Stephen M. Schwartz, and Richard J. Johnson* 515

TGF-β1 in glomerulosclerosis and interstitial fibrosis of adriamycin nephropathy. *Kiyoshi Tamaki, Seiya Okuda, Takashi Ando, Taketo Iwamoto, Masaru Nakayama, and Masatoshi Fujishima* .. 525

Angiotensin converting enzyme inhibitor modulates glomerular function and structure by distinct mechanisms. *Ryojiro Tanaka, Valentina Kon, Toshimasa Yoshioka, Iekuni Ichikawa, and Agnes Fogo* 537

CLINICAL INVESTIGATION

Predicting renal outcomes in severe lupus nephritis: Contributions of clinical and histologic data. *Howard A. Austin III, Dimitrios T. Boumpas, Ellen M. Vaughan, and James E. Balow* 544

Outcome of HCV infection after renal transplantation. *Eric Goffin, Yves Pirson, Chantal Cornu, André Geubel, Jean-Paul Squifflet, and Charles van Ypersele de Strihou* 551

Urinary excretion rate of endothelin-1 in patients with essential hypertension and salt sensitivity. *Aaron Hoffman, Ehud Grossman, David S. Goldstein, John R. Gill, Jr., and Harry R. Keiser* .. 556

Decreased clearance of low-density lipoprotein in patients with chronic renal failure. *Sohvi Hörkkö, Kaisa Huttunen, Taina Korhonen, and Y. Antero Kesäniemi* 561

Suppressed antibody and interleukin-6 responses to acute pyelonephritis in pregnancy. *Christine Petersson, Spencer Hedges, Karin Stenqvist, Torsten Sandberg, Hugh Connell, and Catharina Svanborg* 571

Prophylactic oral anticoagulation in nephrotic patients with idiopathic membranous nephropathy. *François P. Sarasin and Jürg A. Schifferli* 578

Nitric oxide synthase: An endogenous source of elevated nitrite in infected urine. *Shannon D. Smith, Marcia A. Wheeler, and Robert M. Weiss* 586

RAPID COMMUNICATION

Site selective regulation in the kidney of endothelin and its receptor subtypes by cyclosporine. *Shigeki Iwasaki, Toshio Homma, and Valentina Kon* 592

Direct demonstration of insulin-like growth factor-I-induced nitric oxide production by endothelial cells. *Hirokazu Tsukahara, Dmitri V. Gordienko, Burkhard Tonshoff, Marie C. Gelato, and Michael S. Goligorsky* 598

The renal PTH/PTHrP receptor is down-regulated in rats with chronic renal failure. *Pablo Ureña, Marcos Kubrusly, Michael Mannstadt, Milan Hruby, Marie-Marcelle Trinh Trang Tan, Caroline Silve, Bernard Lacour, Abdul-Badi Abou-Samra, Gino V. Segre, and Tilman Drüeke* 605

NEPHROLOGY FORUM

Structural-functional correlations of diabetic nephropathy. *S. Michael Mauer* 612

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 623

Awards and Grants 626

Instructions for Authors on page xxx

Volume 45, Supplement 45

Progression of Renal Disease

Tiberias, Israel

June 20–22, 1993

Table of Contents

Introduction. *William F. Keane, Barry M. Brenner, and Hans-Henrik Parving* S-1

MECHANISMS OF INJURY IN PROGRESSIVE RENAL DISEASE: INSIGHTS FROM EXPERIMENTAL DATA

Moderators: *Barry M. Brenner, John H. Dirks*

Spontaneous glomerulosclerosis: Insights from the fawn-hooded rat. *Abraham P. Provoost* ... S-2

The role of systemic and glomerular hypertension in progressive glomerular injury. *Jaime Herrera-Acosta* S-6

Glomerular volume expansion and mesangial cell mechanical strain: Mediators of glomerular pressure injury. *Pedro Cortes, Bruce L. Riser, Xiyuan Zhao, and Robert G. Narins* S-11

The role of physical forces in alterations of mesangial cell function. *Raymond C. Harris, Yoichi Akai, Takashi Yasuda, and Toshio Homma* S-17

Mechanisms of injury in progressive renal disease: Insights from experimental data: Summary and concluding remarks. *John H. Dirks and Barry M. Brenner* S-22

GLOMERULAR HYPERTROPHY AND PROGRESSION

Moderator: *Giuseppe Remuzzi*

Internephron heterogeneity of growth factors and sclerosis. *Agnes Fogo* S-24

Glomerular hypertrophy and progressive glomerulopathy. Is there a definite pathogenetic correlation? *Roberto Zatz and Clarice Kazue Fujihara* S-27

Glomerular hypertrophy and progression: Summary and concluding remarks. *Giuseppe Remuzzi* S-30

CELLULAR MECHANISMS OF GLOMERULAR INJURY I

Moderator: *Gary E. Striker*

Tumor necrosis factor alpha in glomerular injury. *Laurent Baud and Raymond Ardaillou* S-32

Vascular endothelial cell activation in models of vascular and glomerular injury. *Robert J. Stewart and Philip A. Marsden* S-37

Does extracellular matrix expansion in glomerular disease require mesangial cell proliferation? *Eudora Eng, Jürgen Floege, Bessie A. Young, William G. Couser, and Richard J. Johnson* .. S-45

Gene activation in glomerulosclerosis: A role for growth promoting hormones. *Emmanuel P. Peten, Chih-Wei Yang, Gary E. Striker, and Liliane J. Striker* S-48

Cholesterol synthesis inhibitors inhibit more than cholesterol synthesis. *Bertram L. Kasiske, Michael P. O'Donnell, Youngki Kim, Durgaprasadarao Atluru, and William F. Keane* S-51

Cellular mechanism of glomerular injury: Metabolic factors in progressive renal injury. *Detlef Schlondorff* S-54

Cellular mechanisms of glomerular injury I: Summary and concluding remarks. *Gary E. Striker* S-56

CELLULAR MECHANISMS OF GLOMERULAR INJURY II

Moderator: *Helmut G. Rennke*

How does glomerular epithelial cell injury contribute to progressive glomerular damage? *Helmut G. Rennke* S-58

Contents continued on next page

The role of podocytes in the development of glomerular sclerosis. *Wilhelm Kriz, Marlies Elger, Michio Nagata, Matthias Kretzler, Sören Uiker, Inge Koeppen-Hagemann, Sibylle Tenschert, and Kevin V. Lemley* S-64

The mesangial matrix in the normal and sclerotic glomerulus. *Norman D. Rosenblum* S-73

Cellular mechanisms of glomerular injury II: Summary and concluding remarks. *Helmut G. Rennke* S-78

ROLE OF MACROPHAGES IN RENAL INJURY

Moderator: *Robert C. Atkins*

Macrophages in renal injury. *David J. Nikolic-Paterson, Hui Y. Lan, Prudence A. Hill, and Robert C. Atkins* S-79

Pivotal role of colony stimulating factor-1 in lupus nephritis. *Vicki Rubin Kelley, Roy D. Bloom, Mary A. Yui, Carla Martin, and Debbie Price* S-83

Integrin matrix receptors in renal injury. *Stephen Adler* S-86

Leukocyte adhesion promotes biosynthesis of lipoxygenase products by transcellular routes. *Hugh R. Brady, Aikaterina Papayianni, and Charles N. Serhan* S-90

Role of macrophages in glomerular injury and leukocyte adhesion molecules: Summary and concluding remarks. *Robert C. Atkins* S-98

TUBULOINTERSTITIAL INJURY AND ITS ROLE IN PROGRESSIVE RENAL DAMAGE

Moderator: *Eric G. Neilson*

Energy metabolism following reduction of renal mass. *Joseph I. Shapiro, Nancy Elkins, Oscar K. Reiss, Gultekin Suleymanlar, Haoran Jin, Robert W. Schrier, and Laurence Chan* S-100

The role of lymphocytes in the progression of interstitial disease. *Frank Strutz and Eric G. Neilson* S-106

The role of oxidants in progressive renal injury. *Karl A. Nath, Michael Fischereder, and Thomas H. Hostetter* S-111

Tubulointerstitial injury and its role in progressive renal damage: Summary and concluding remarks. *Eric G. Neilson* S-116

ASSESSMENT OF ENDPOINTS IN THE STUDY OF PROGRESSIVE RENAL DISEASE

Moderator: *Giuseppe D'Amico*

Renal endpoints in nondiabetic patients. *Lamberto Oldrizzi, Carlo Rugiu, Vincenzo de Biase, and Giuseppe Maschio* S-118

Outcome variables in the assessment of progression of diabetic kidney disease. *GianCarlo Viberti* S-121

Hypercholesterolemia—A determinant of renal function loss and deaths in IDDM patients with nephropathy. *Andrzej S. Krolewski, James H. Warram, and A. Richard Christlieb* S-125

Assessment of endpoints in the study of progressive renal disease: Summary and concluding remarks. *Giuseppe D'Amico* S-132

CLINICAL EXPERIENCE IN THE TREATMENT OF DIABETIC RENAL DISEASE (TYPE I AND TYPE II)

Moderator: *Hans-Henrik Parving*

Ambulatory blood pressure and abnormal albuminuria in type 1 diabetic patients. *Klavs W. Hansen, Per L. Poulsen, and Carl Erik Mogensen* S-134

Long-term enalapril treatment in diabetic nephropathy. *Henrik Mulec, Svend Aage Johnsen, and Staffan Björck* S-141

Reduction in albuminuria predicts diminished progression in diabetic nephropathy. *Peter Rossing, Eva Hommel, Ulla M. Smidt, and Hans-Henrik Parving* S-145

Contents continued on next page

Renal protective effects of enalapril in hypertensive NIDDM: Role of baseline albuminuria. *Harold E. Lebovitz, Thomas B. Wiegmann, Avital Cnaan, Shahnaz Shahinfar, Domenic A. Sica, Vasti Broadstone, Sherwyn L. Schwartz, Marvin C. Mengel, Robert Segal, Joan A. Versaggi, and W. Kline Bolton* S-150

Angiotensin converting enzyme inhibition in diabetic nephropathy. *Julia A. Breyer, Lawrence G. Hunsicker, Raymond P. Bain, Edmund J. Lewis, and The Collaborative Study Group* S-156

Long-term effect of ACE inhibition on development of nephropathy in diabetes mellitus type II. *Mordchai Ravid, Hilel Savin, Itzhak Jutrin, Tamir Bental, Ruth Lang, and Michael Lishner* .. S-161

Clinical experience in the treatment of diabetic renal disease (type I and type II): Summary and concluding remarks. *Hans-Henrik Parving* S-165

CLINICAL EXPERIENCE IN THE TREATMENT OF NON-DIABETIC RENAL DISEASE

Moderator: *Jose L. Rodicio*

Prevention of progression in non-diabetic chronic renal failure. *Gavin J. Becker, Judith A. Whitworth, Benno U. Ihle, Shahnaz Shahinfar, and Priscilla S. Kincaid-Smith* S-167

Long-term influences of antihypertensive therapy on microalbuminuria in essential hypertension. *Luis M. Ruilope, Jose M. Alcázar, Eduardo Hernández, Manuel Praga, Vicente Lahera, and Jose L. Rodicio* S-171

Short-term antiproteinuric response to antihypertensive treatment predicts long-term GFR decline in patients with non-diabetic renal disease. *Alfred J. Apperloo, Dick de Zeeuw, and Paul E. de Jong* S-174

Clinical experience in the treatment of non-diabetic renal disease: Summary and concluding remarks. *Jose L. Rodicio* S-179

KIDNEY INTERNATIONAL

Official Journal of the International Society of Nephrology

Le Journal Official de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Dialysis disequilibrium syndrome: Current concepts on pathogenesis and prevention. *Allen I. Arieff* 629

LABORATORY INVESTIGATION

Aluminum alters the compartmentalization of iron in Friend erythroleukemia cells. *Kenneth Abreo, Jonathan Glass, Sushil Jain, and M'Liss Sella* 636

Escape from the antiproliferative effect of transforming growth factor-β_1 in LLC-PK$_1$ renal epithelial cells. *Robert J. Anderson, Heather T. Sponsel, David J. Kroll, Steven Jackson, Ruth Breckon, and James P. Hoeffler* 642

Glomerular prostaglandins modulate vascular reactivity of the downstream efferent arterioles. *Shuji Arima, YiLin Ren, Luis A. Juncos, Oscar A. Carretero, and Sadayoshi Ito* 650

Polyol pathway mediates high glucose-induced collagen synthesis in proximal tubule. *Anthony J. Bleyer, Peter Fumo, Edward R. Snipes, Stanley Goldfarb, David A. Simmons, and Fuad N. Ziyadeh* 659

Deferoxamine augments growth and pathogenicity of *Rhizopus*, while hydroxypyridinone chelators have no effect. *Johan R. Boelaert, Jan Van Cutsem, Marielle de Locht, Yves-Jacques Schneider, and Robert R. Crichton* 667

Tissue-specific modulation of Na, K-ATPase α-subunit gene expression in uremic rats. *Pilar Bofill, I. Annelise Goecke, Silvia Bonilla, Miriam Alvo, and Elisa T. Marusic* 672

Developmental changes in rat renal 11β-hydroxysteroid dehydrogenase. *Andrew S. Brem, Bobby Bina, Karen L. Matheson, Jeffrey L. Barnes, and David J. Morris* 679

Experimental nephrotoxicity, hepatotoxicity and pharmacokinetics of cyclosporin G versus cyclosporin A. *Emmanuel A. Burdmann, Takeshi F. Andoh, Seymour Rosen, Jessie Lindsley, Myrna Y. Munar, Lawrence W. Elzinga, and William M. Bennett* 684

Effects of neurohypophyseal antagonists in postnephrectomy natriuresis in male rats. *Wan Huang, Siu-Lan Lee, and Mats Sjöquist* 692

The ICAM-1/LFA-1 interaction in glomerular leukocytic accumulation in anti-GBM glomerulonephritis. *Prudence A. Hill, Hui Y. Lan, David J. Nikolic-Paterson, and Robert C. Atkins* 700

Characterization and distribution of interstitial cell types in the renal cortex of rats. *Brigitte Kaissling and Michel Le Hir* 709

COL4A5 gene deletion and production of post-transplant anti-α3 (IV) collagen alloantibodies in Alport syndrome. *Raghuram Kalluri, Manfred Weber, Kai-Olaf Netzer, Mae Jane Sun, Eric G. Neilson, and Billy G. Hudson* 721

Classical and channel-like urate transporters in rabbit renal brush border membranes. *Barbara A. Knorr, Jeanne C. Beck, and Ruth G. Abramson* 727

Effects of guanidino and uremic compounds on nitric oxide pathways. *Raymond J. MacAllister, Guy St.J. Whitley, and Patrick Vallance* 737

Metabolic support of Na^+ transport by the rabbit CCD: Analysis of the use of equivalent current. *Tatsuya Nonaka and John B. Stokes* 743

Contents continued on next page

Tubular lipidosis: Epiphenomenon or pathogenetic lesion in human renal disease? *Albert C.M. Ong and John F. Moorhead* 753

Activation of autoreactive T-lymphocytes by cultured syngeneic glomerular mesangial cells. *Heinfried H. Radeke, Andreas Emmendörffer, Peter Uciechowski, Juliane von der Ohe, Beate Schwinzer, and Klaus Resch* 763

Glomerular thrombosis in pregnancy: Role of the L-arginine-nitric oxide pathway. *Leopoldo Raij, with the technical assistance of Karen Coffee, Janeth Guerra, and Dawn Holmes* 775

Low plasma and renal tissue levels of L-arginine in rats with obstructive nephropathy. *Alvaro A. Reyes, Irene E. Karl, Jesse Yates, and Saulo Klahr* 782

Measurement of intracellular generation of hydrogen peroxide by rat glomeruli *in vitro*. *Norishi Ueda, Bertrand Guidet, and Sudhir V. Shah* 788

Acute and chronic effects of thromboxane A_2 inhibition on the renal hemodynamics in streptozotocin-induced diabetic rats. *Kohei Uriu, Kazo Kaizu, Osamu Hashimoto, Norikuni Komine, and Sumiya Etoh* 794

Cl^- channels in basolateral renal medullary vesicles VIII. Partial purification and functional reconstitution of basolateral mTAL Cl^- channels. *Christopher J. Winters, W. Brian Reeves, and Thomas E. Andreoli* 803

Cell Ca^{2+} response to luminal vasopressin in cortical collecting tubule principal cells. *Masahiro Ikeda, Koji Yoshitomi, Masashi Imai, and Kiyoshi Kurokawa* 811

Clusterin depletion enhances immune glomerular injury in the isolated perfused kidney. *Jocelyn R. Saunders, Atousa Aminian, Jennifer L. McRae, Katrina A. O'Farrell, William R. Adam, and Brendan F. Murphy* 817

CLINICAL INVESTIGATION

Expression of clusterin in human renal diseases. *Jeffrey Dvergsten, J. Carlos Manivel, Ricardo Correa-Rotter, and Mark E. Rosenberg* 828

Expression of J chain mRNA in duodenal IgA plasma cells in IgA nephropathy. *Steven J. Harper, James H. Pringle, Anthony C.B. Wicks, Jane Hattersley, Lorna Layward, Alice Allen, Angela Gillies, Ian Lauder and John Feehally* 836

Antiplatelet therapy and development of hypertension induced by recombinant human erythropoietin in uremic patients. *Francisco Caravaca, José L. Pizarro, Manuel Arrobas, Juan J. Cubero, María C. García, and Manuel Perez-Miranda* 845

Short-term effects of low protein-normal sodium diet on renal function in chronic renal failure. *Bruno Cianciaruso, Vincenzo Bellizzi, Alfredo Capuano, Giuseppe Bovi, Anna Nastasi, Giuseppe Conte, and Luca de Nicola* 852

Is the antiproteinuric effect of ACE inhibition mediated by interference in the renin-angiotensin system? *Ron T. Gansevoort, Dick de Zeeuw, and Paul E. de Jong* 861

Fcα R expression on polymorphonuclear leukocyte and superoxide generation in IgA nephropathy. *Abul Kashem, Masayuki Endoh, Yasuo Nomoto, Hideto Sakai, and Hiroe Nakazawa* 868

Enhanced LDL oxidation in uremic patients: An additional mechanism for accelerated atherosclerosis? *Elena Maggi, Roberto Bellazzi, Francesco Falaschi, Arturo Frattoni, Guido Perani, Giorgio Finardi, Antonietta Gazo, Maurizio Nai, Dino Romanini, and Giorgio Bellomo* 876

Magnetic resonance, a new method for measuring blood flow in hemodialysis fistulae. *Louk F.I.J. Oudenhoven, Peter M.T. Pattynama, Albert de Roos, Harry J.J. Seeverens, Sidney A. Rebergen, and Peter C. Chang* 884

Plasma levels of IL-1β, TNFα and their specific inhibitors in undialyzed chronic renal failure, CAPD and hemodialysis patients. *Brian J.G. Pereira, Leland Shapiro, Andrew J. King, Matheos E. Falagas, James A. Strom, and Charles A. Dinarello* 890

Effects of erythropoietin therapy on the lipid profile in end-stage renal failure. *Carol A. Pollock, Roger Wyndham, Paul V. Collett, Grahame Elder, Michael J. Field, Steven Kalowski, James R. Lawrence, David A. Waugh, and Charles R.P. George* 897

Acute hemodialysis of infants weighing less than five kilograms. *Robert H. Sadowski, William E. Harmon, and Kathy Jabs* 903

Socioeconomic status and end-stage renal disease in the United States. *Eric W. Young, Elizabeth A. Mauger, Kai-Hong Jiang, Freidrich K. Port, and Robert A. Wolfe* 907

TECHNICAL NOTE

Adaptive control of anticoagulation during hemodialysis. *Thomas C. Jannett, Michael G. Wise, Nancy H. Shanklin, and Paul W. Sanders* 912

RAPID COMMUNICATION

Sustained expression of TGF-β1 underlies development of progressive kidney fibrosis. *Tatsuo Yamamoto, Nancy A. Noble, Diane E. Miller, and Wayne A. Border* 916

NEPHROLOGY FORUM

Lupus nephritis: Lessons from the path lab. *Michael Kashgarian* 928

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 939

Awards and Grants 942

EDITORIAL REVIEW

Macrophages in acute glomerular inflammation. *Victoria Cattell* 945

LABORATORY INVESTIGATION

Factors in the development of secondary hyperparathyroidism during graded renal failure in the rat. *Jordi Bover, Mariano Rodriguez, Pedro Trinidad, Aquiles Jara, Maria E. Martinez, Lorraine Machado, Francisco Llach, and Arnold J. Felsenfeld* 953

Glomerulopathy induced by IgG3 anti-trinitrophenyl monoclonal cryoglobulins derived from non-autoimmune mice. *Thierry Fulpius, Thierry Berney, Robert Lemoine, Yves Pastore, Luc Reininger, Guy Brighouse, and Shozo Izui* 962

15-HETE: Selective incorporation into inositol phospholipids of MDCK cells. *Richard A. Girton, Arthur A. Spector, and Joel A. Gordon* 972

Loop diuretics reduce hypoxic damage to proximal tubules of the isolated perfused rat kidney. *Samuel N. Heyman, Seymour Rosen, Franklin H. Epstein, Katherine Spokes, and Mayer L. Brezis* 981

Exclusion of eight genes as mutated loci in congenital nephrotic syndrome of the Finnish type. *Marjo Kestilä, Minna Männikkö, Christer Holmberg, Kaija Korpela, Eeva-Riitta Savolainen, Leena Peltonen, and Karl Tryggvason* 986

Histone mediates glomerular deposition of small size DNA anti-DNA complex. *Tetsuo Morioka, Rainer Woitas, Yoshihide Fujigaki, Stephan R. Batsford, and Arnold Vogt* 991

Location of an inducible nitric oxide synthase mRNA in the normal kidney. *Jeremiah J. Morrissey, Ruth McCracken, Hiroyuki Kaneto, Matti Vehaskari, David Montani, and Saulo Klahr* 998

Dietary protein alters tubular iron accumulation after partial nephrectomy. *Brian J. Nankivell, Yuet-Ching Tay, Ross A. Boadle, and David C.H. Harris* 1006

The intensity of acidosis differentially alters the pathways of ammoniagenesis in LLC-PK_1 cells. *Itzhak Nissim, Atul Sahai, Rose S. Sandler, and Richard L. Tannen* 1014

Regulation of calcitriol receptor and its mRNA in normal and renal failure rats. *Sanjeevkumar R. Patel, Hui Qiong Ke, and Chen H. Hsu* 1020

Epidermal growth factor antagonizes vasopressin *in vivo* and *in vitro*. *Paddy A. Phillips, Sharon L. Grant, A. Fiona Davidson, John Risvanis, Jayne Stephenson, and Christine B. Gow* 1028

Intracellular calcium concentration and activation of the Na^+/H^+ exchanger in essential hypertension. *Esteban Poch, Albert Botey, Joan Gaya, Alejandro Darnell, Francisca Rivera, and Luis Revert* 1037

Cell-mediated immune injury in the kidney: Acute nephritis induced in the rat by azobenzenearsonate. *Helmut G. Rennke, Philip S. Klein, Deborah J. Sandstrom, and Donna L. Mendrick* ... 1044

Reactive oxygen species in puromycin aminonucleoside nephrosis: *In vitro* studies. *Sharon D. Ricardo, John F. Bertram, and Graeme B. Ryan* 1057

K^+-sparing diuretic actions of trimethoprim: Inhibition of Na^+ channels in A6 distal nephron cells. *Lynn E. Schlanger, Thomas R. Kleyman, and Brian N. Ling* 1070

Extracellular matrix accumulation in immune-mediated tubulointerstitial injury. *Winson W. Tang, Lili Feng, Yiyang Xia, and Curtis B. Wilson* 1077

Contents continued on next page

Reduced hepatic growth hormone (GH) receptor gene expression and increased plasma GH binding protein in experimental uremia. *Burkhard Tönshoff, Staffan Edén, Eckart Weiser, Björn Carlsson, Iain C.A.F. Robinson, Werner F. Blum, and Otto Mehls* 1085

Role of cytosolic Ca^{2+} and protein kinases in the induction of the *hsp70* gene. *Naritaka Yamamoto, Mary W. Smith, Atsuhiko Maki, Irene K. Berezesky, and Benjamin F. Trump* 1093

$B7^{+}$-transfectant tubular epithelial cells induce T cell anergy, ignorance or proliferation. *Hitoshi Yokoyama, Xinxiao Zheng, Terry B. Strom, and Vicki Rubin Kelley* 1105

Altered cytosolic calcium homeostasis in rat cardiac myocytes in CRF. *Yi-Bin Zhang, Miroslaw Smogorzewski, Zhenmin Ni, and Shaul G. Massry* 1113

Neutrophil activation *in vitro* and *in vivo* in Wegener's granulomatosis. *Elisabeth Brouwer, Minke G. Huitema, A.H. Leontine Mulder, Peter Heeringa, Harry van Goor, Jan Willem Cohen Tervaert, Jan J. Weening, and Cees G.M. Kallenberg* 1120

CLINICAL INVESTIGATION

Juxtaglomerular body abnormalities in youth-onset diabetic subjects. *Elsa P. Paulsen, Barbara A. Burke, Robert L. Vernier, Michael J. Mallare, Donald J. Innes, Jr., and Benjamin C. Sturgill* .. 1132

Intracranial aneurysms in autosomal dominant polycystic kidney disease. *Dominique Chauveau, Yves Pirson, Christine Vereleen-Dumoulin, Anne Macnicol, Ana Gonzalo, and Jean-Pierre Grünfeld* 1140

Glucose oxidation after a peritoneal and an oral glucose load in dialyzed patients. *Jacques Delarue, Claude Maingourd, Fernand Lamisse, Marie-Ange Garrigue, Philippe Bagros, and Charles Couet* 1147

Is there evidence for anticipation in autosomal-dominant polycystic kidney disease? *Godela M. Fick, Ann M. Johnson, and Patricia A. Gabow* 1153

Continuous ambulatory peritoneal dialysis and hemodialysis: Comparison of patient mortality with adjustment for comorbid conditions. *Philip J. Held, Friedrich K. Port, Marc N. Turenne, Daniel S. Gaylin, Richard J. Hamburger, and Robert A. Wolfe* 1163

Aspirin renography to detect unilateral renovascular hypertension. *Masahito Imanishi, Michiko Yano, Kohei Hayashida, Yoshio Ishida, Makoto Takamiya, Genjiro Kimura, Shunichi Kojima, Yuhei Kawano, Yohkazu Matsushima, Hiroaki Matsuoka, and Teruo Omae* 1170

Correction of central venous stenoses: Use of angioplasty and vascular Wallstents. *Eugene C. Kovalik, Glenn E. Newman, Paul Suhocki, Mark Knelson, and Steve J. Schwab* 1177

Adaptive responses to very low protein diets: The first comparison of ketoacids to essential amino acids. *Tahsin Masud, Vernon R. Young, Tom Chapman, and Bradley J. Maroni* 1182

Therapy for idiopathic membranous nephropathy: Tailoring the choice by decision analysis. *Antonio Piccoli, Luana Pillon, Patrizia Passerini, and Claudio Ponticelli* 1193

Sequential effects of cyclosporine therapy on blood pressure, renal function and neurohormones. *Nigel D.C. Sturrock, Chim C. Lang, Peter H. Baylis, and Allan D. Struthers* 1203

TECHNICAL NOTE

Reliable atomic absorption analysis of sodium and potassium in rat renal tubular fluid. *Peter Boer, Branko Braam, René Fransen, Walther H. Boer, and Hein A. Koomans* 1211

RAPID COMMUNICATION

Induction of nitric oxide synthase in rat immune complex glomerulonephritis. *Albertine Jansen, Terence Cook, G. Michael Taylor, Penelope Largen, Valentina Riveros-Moreno, Salvador Moncada, and Victoria Cattell* 1215

Adenoviral-mediated gene transfer to renal tubular cells *in vivo*. *Philippe Moullier, Gérard Friedlander, Denis Calise, Pierre Ronco, Michel Perricaudet, and Nicolas Ferry* 1220

NEPHROLOGY FORUM

Peritoneal dialysis. *Cidio Chaimovitz* 1226

HISTORICAL ARCHIVE

Osmotic diuresis before Homer W. Smith: A winding path to renal physiology. *Gabriel C. Richet* 1241

EDITORIAL REVIEW

Leukocyte adhesion molecules and kidney diseases. *Hugh R. Brady* 1285

LABORATORY INVESTIGATION

Selective inhibition of 5-lipoxygenase attenuates glomerulonephritis in the rat. *Christine R. Albrightson, Brian Short, George Dytko, Bogdan Zabko-Potapovich, Bridget Brickson, Jerry L. Adams, and Don E. Griswold* 1301

IL-8 production by peripheral blood mononuclear cells in nephrotic patients. *Eduardo H. Garin, D. Kay Blanchard, Kouji Matsushima, and Julie Y. Djeu* 1311

Insulin attenuates intracellular calcium responses and cell contraction caused by vasoactive agents. *Yoji Inishi, Toshihiro Okuda, Toshio Arakawa, and Kiyoshi Kurokawa* 1318

Glomerular macrophage phagocytic activity in experimental immune complex nephritis. *Marva M. Moxey-Mims and Bernice Noble* 1326

Neonatal ureteral obstruction stimulates recruitment of renin-secreting renal cortical cells. *Victoria F. Norwood, Robert M. Carey, Katalin M. Geary, Pedro A. Jose, R. Ariel Gomez, and Robert L. Chevalier* 1333

Localization of cyclophilin A and cyclophilin C mRNA in murine kidney using RT-PCR. *Masakazu Otsuka, Yoshio Terada, Tianxin Yang, Hiroshi Nonoguchi, Kimio Tomita, and Fumiaki Marumo* .. 1340

L-arginine decreases the infiltration of the kidney by macrophages in obstructive nephropathy and puromycin-induced nephrosis. *Alvaro A. Reyes, Beatriz H. Porras, Fred I. Chasalow, and Saulo Klahr* 1346

Functional versus structural changes in the pathophysiology of acute ischemic renal failure in aging rats. *Massimo Sabbatini, Gennaro Sansone, Francesco Uccello, Luca de Nicola, Antonella Giliberti, Vincenzo Sepe, Paola Magri, Giuseppe Conte, and Vittorio E. Andreucci* 1355

Effects of hyperosmolality on ANP-stimulated cGMP generation in rat inner medullary collecting duct. *Masanori Shinohara, Hiroshi Nonoguchi, Kazutomo Ujiie, Yoshio Terada, Akira Owada, Kimio Tomita, and Fumiaki Marumo* 1362

Coupling of cell volume and membrane potential changes to fluid secretion in a model of renal cysts. *Lawrence P. Sullivan, Darren P. Wallace, and Jared J. Grantham* 1369

Albumin and transferrin synthesis are increased in H4 cells by serum from analbuminemic or nephrotic rats. *Xihua Sun and George A. Kaysen* 1381

Mitochondrial DNA deletion: A cause of chronic tubulointerstitial nephropathy. *Matthias J. Szabolcs, Robert Seigle, Sarah Shanske, Eduardo Bonilla, Salvatore DiMauro, and Vivette D'Agati* 1388

CLINICAL INVESTIGATION

Studies of the vessel wall properties in hemodialysis patients. *Michael Barenbrock, Claus Spieker, Volker Laske, Stefan Heidenreich, Helge Hohage, Jürgen Bachmann, Arnold P.G. Hoeks, and Karl-Heinz Rahn* 1397

Mechanical versus pharmacomechanical thrombolysis for the treatment of thrombosed dialysis access grafts. *Gerald A. Beathard* 1401

Kidney in Galloway-Mowat syndrome: Clinical spectrum with description of pathology. *Arthur H. Cohen and Miriam C. Turner* 1407

Collapsing glomerulopathy: A clinically and pathologically distinct variant of focal segmental glomerulosclerosis. *Randal K. Detwiler, Ronald J. Falk, Susan L. Hogan and J. Charles Jennette* 1416

Contents continued on next page

Adenosine antagonist theophylline prevents the reduction of glomerular filtration rate after contrast media application. *Christiane M. Erley, Stephan H. Duda, Susanne Schlepckow, Jürgen Koehler, Peter E. Huppert, Walter L. Strohmaier, Adalbert Bohle, Teut Risler, and Hartmut Osswald* ... 1425

Skeletal muscle protein synthesis and degradation in patients with chronic renal failure. *Giacomo Garibotto, Rodolfo Russo, Antonella Sofia, Maria Rita Sala, Cristina Robaudo, Paolo Moscatelli, Giacomo Deferrari, and Alberto Tizianello* ... 1432

Recurrence of steroid-resistant nephrotic syndrome in kidney transplants is associated with increased acute renal failure and acute rejection. *Eun-Mi Kim, Jane Striegel, Youngki Kim, Arthur J. Matas, John S. Najarian, and S. Michael Mauer* ... 1440

Long-term renal tolerance of cyclosporin A treatment in adult idiopathic nephrotic syndrome. *Alain Meyrier, Laure-Helene Noël, Pascal Auriche, Patrice Callard, and the Collaborative Group of the Société de Néphrologie, with the technical assistance of Doreen Broneer* ... 1446

Opposite renal effects of a PGE_1 analog and prostacyclin in humans. *Svetlozar Natov, François Schmitt, Achour Ikeni, Bernard Lacour, and Thierry P. Hannedouche* ... 1457

Immunoreactive and bioactive luteinizing hormone in pubertal patients with chronic renal failure. *Franz Schaefer, Johannes D. Veldhuis, William R. Robertson, David Dunger, Karl Schärer, and the Cooperative Study Group on Pubertal Development in Chronic Renal Failure* ... 1465

Anti-platelet therapy in graft thrombosis: Results of a prospective randomized double-blind study. *Rajanna Sreedhara, Jonathan Himmelfarb, J. Michael Lazarus, and Raymond M. Hakim* ... 1477

Functional characterization of cytokine autoantibodies in chronic renal failure patients. *Gere Sunder-Plassmann, Stelio Kapiotis, Christoph Gasche, Ursula Klaar, with the technical assistance of Brigitte Mai* ... 1484

Non-invasive measurement of respiratory chain dysfunction following hypothermic renal storage and transplantation. *Maureen S. Thorniley, Nick J. Lane, Sanjiv Manek, and Colin J. Green* ... 1489

Bradykinin is a mediator of anaphylactoid reactions during hemodialysis with AN69 membranes. *Luc Verresen, Edwin Fink, Horst-Dieter Lemke, and Yves Vanrenterghem* ... 1497

RAPID COMMUNICATION

A monoclonal antibody marker for Alport syndrome identifies the Alport antigen as the $\alpha 5$ chain of type IV collagen. *Jie Ding, Clifford E. Kashtan, Wei Wei Fan, Mary M. Kleppel, Mac Jane Sun, Raghuram Kalluri, Eric G. Neilson, and Alfred F. Michael* ... 1504

Interferon treatment for chronic hepatitis C virus infection in uremic patients. *Paul Koenig, Wolfgang Vogel, Florian Umlauft, Katharina Weyrer, Rupert Prommegger, Karl Lhotta, Ulrich Neyer, Hans-Krister Stummvoll, and Kurt Gruenewald* ... 1507

EGF and TGF-α in the human kidney: Identification of octopal cells in the collecting duct. *Etienne J. Nouwen and Marc E. De Broe* ... 1510

NEPHROLOGY FORUM

Assessing adequacy of hemodialysis: Urea modeling. *Thomas A. Depner* ... 1522

Table of contents

EDITORIAL REVIEW

Acidification in mammalian cortical distal tubule. *Giovanni Capasso, Gerhard Manic, Tong Wang, and Gerhard Geibisch* 1543

LABORATORY INVESTIGATION

Relative roles of elastase and reactive oxygen species in the degradation of human glomerular basement membrane by intact human neutrophils. *Kieron L. Donovan, Malcolm Davies, Gerald A. Coles, and John D. Williams* 1555

Cytokine-induced expression of leukemia inhibitory factor in renal mesangial cells. *Andrea Hartner, R. Bernd Sterzel, Norbert Reindl, Gertrud M. Hocke, Georg H. Fey, and Margarete Goppelt-Streube* 1562

FK506 inhibits renal glomerular thrombosis induced in rats by nephrotoxic serum and lipopolysaccharide. *Keiju Hiromura, Jun'ichi Hayashi, Yoshito Tsukada, Kumeo Ono, Akiyasu Tsuchida, Shintaro Yano, and Takuji Naruse* 1572

Gene transfer of metalloproteinase transin induces aberrant behavior of cultured mesangial cells. *Masanori Kitamura, Takuji Shirasawa, and Naoki Maruyama* 1580

Effects of dietary protein and uninephrectomy on renal angiotensin converting enzyme activity in the rat. *Bruno Michel, Michèle Grima, Catherine Coquard, Corinne Welsch, Mariette Barthelmebs, and Jean-Louis Imbs* 1587

Low protein diet blunts the rise in glomerular gene expression in focal glomerulosclerosis. *Tsukasa Nakamura, Mitsumine Fukui, Isao Ebihara, Yasuhiko Tomino, and Hikaru Koide* 1593

Coexisting NPY and NE synergistically regulate renal tubular Na^+, K^+-ATPase activity. *Yoshiyuki Ohtomo, Björn Meister, Tomas Hökfelt, and Anita Aperia* 1606

Regulation of the renal angiotensin II receptor gene in acute unilateral ureteral obstruction. *J. Luis Pimentel, Jr., Susheng Wang, and Manuel Martinez-Maldonado* 1614

Modulation of renal EGF in dichromate-induced acute renal failure treated with thyroid hormone. *Gail Seiken, F. Gregory Grillo, R. Paul Schaudies, and John P. Johnson* 1622

Oxidation of low density lipoprotein by mesangial cells may promote glomerular injury. *David C. Wheeler, Ravinder S. Chana, Nicholas Topley, Meryl M. Peterson, Malcolm Davies, and John D. Williams* 1628

Enalapril reduces collagen type IV synthesis and expansion of the interstitium in the obstructed rat kidney. *Hiroyuki Kaneto, Jeremiah Morrissey, Ruth McCracken, Alvaro Reyes, and Saulo Klahr* 1637

CLINICAL INVESTIGATION

Immunohistochemical localization of collagen VI in diabetic glomeruli. *Andreas G. Nerlich, Erwin D. Schleicher, Irmgard Wiest, Ulrich Specks, and Rupert Timpl* 1648

Renal functional reserve in cyclosporin-treated recipients of kidney transplant. *Jean-Louis Ader, Ivan Tack, Jean-Jacques Lloveras, Tuan Tran-Van, Lionel Rostaing, François Praddaude, Dominique Durand, and Jean-Michel Suc* 1657

Estimating glomerular number *in situ* using magnetic resonance imaging and biopsy. *John M. Basgen, Michael W. Steffes, Arthur E. Stillman, and S. Michael Mauer* 1668

Contents continued on next page

Amelioration of diabetic nephropathy by treatment with monoclonal antibodies against glycated albumin. *Margo P. Cohen, Elizabeth Hud, and Van-Yu Wu* 1673

Chinese herbs nephropathy: A clue to Balkan endemic nephropathy? *Jean-Pierre Cosyns, Michel Jadoul, Jean-Paul Squifflet, Jean-Françoise De Plaen, Dusan Ferluga, and Charles van Ypersele de Strihou*..... 1680

Determinants of the serum concentrations of low molecular weight proteins in patients on maintenance hemodialysis. *André Kabanda, Michel Jadoul, Jean Michel Pochet, Robert Lauwerys, Charles van Ypersele de Strihou, and Alfred Bernard*..... 1689

Tubular catabolism of albumin is associated with the release of an inflammatory lipid. *Deborah Kees-Folts, Jenny Levis Sadow, and George F. Schreiner*..... 1697

Prospective trial of pulse oral versus intravenous calcitriol treatment of hyperparathyroidism in ESRD. *L. Darryl Quarles, Daniel A. Yohay, Barbara A. Carroll, Charles E. Spritzer, Sharon A. Minda, Dorothy Bartholomay, and Bruce A. Lobaugh* 1710

An increasing number of calcium oxalate stone events worsens treatment outcome. *Joan H. Parks and Fredric L. Coe* 1722

Effects or atrial natriuretic peptide in clinical acute renal failure. *S. Noor Rahman, Grace E. Kim, Alan S. Mathew, Carol A. Goldberg, Robin Allgren, Robert W. Schrier, and John D. Conger*.. 1731

A prospective study of peritoneal transport in CAPD patients. *Dirk G. Struijk, Raymond T. Krediet, Gerardus C.M. Koomen, Elisabeth W. Boeschoten, Franciscus J. Hoek, and Lambertus Arisz* 1739

Renal ammonia in autosomal dominant polycystic kidney disease. *Vicente E. Torres, Douglas S. Keith, Kenneth P. Offord, Sui P. Kon, and David M. Wilson* 1745

Recombinant hirudin: A specific thrombin inhibiting anticoagulant for hemodialysis. *Raymond C. Vanholder, Anne A. Camez, Nic M. Veys, Jeannette Soria, Manouchehr Mirshahi, Claudine Soria, and Séverin Ringoir*..... 1754

Post-ischemic acute renal failure protects proximal tubules from O_2 deprivation injury, possibly by inducing uremia. *Richard A. Zager, Mineo Iwata, Kristin M. Burkhart, and Brian A. Schimpf* 1760

NEPHROLOGY FORUM

The glomerular response to injury: Progression or resolution? *Richard J. Johnson* 1769
